What is a Credit Union? It's essentially a nonprofit member-owned version of a bank. Once you become a member, you can open savings and checking accounts and obtain loans and credit cards. The WVU Credit Union was founded on the philosophy of people helping people. The WVU Credit Union returns profits to members in the form of free services, lower-rate loans and higher-rate savings accounts.

When you become a member, you become an owner, and that status translates into certain privileges: Lower rates on loans and credit cards, More forgiving qualification standards, Higher rates on savings accounts, & Personalized credit assistance.
